15th TechNet Conference Building the next generation of immunization supply chains 16-20 October 2017 Cascais, Portugal

Invitation to participate in the Project Gallery

We are reaching out to explore immunization partners' interest in participating in the Project Gallery during the 15th TechNet Conference. If you are interested in participating in the Project Gallery during the TechNet Conference please read on.

The Project Gallery is an integral part of the TechNet Conference and one of the side events that is organized alongside the main conference agenda. This side event is offered in part to respond to the inability to include in the formal conference agenda, all the exciting immunization supply chain projects, research, evidence or demonstration projects being conducted and implemented by partners. In response to this, a dedicated room will be made available for partners to showcase their work on immunization supply chains through scheduled posters, video presentations and resources to display.

Project Gallery in Bangkok, Thailand, 2015. PHOTO: WHO

We are particularly interested in posters, videos or other resources to display that relate to:

- Vaccine products and delivery technologies
- Vaccine and equipment procurement and forecasting
- Network design and supply chain optimization
- Human resources for logistics
- Vaccine management policies and practice
- Cold chain equipment & maintenance systems
- Temperature monitoring in the cold chain
- Distribution and transportation systems
- LMIS and data for management

If you wish to participate in the Project Gallery, please submit an Expression of Interest (EOI). Submitting an EOI will formalize your interest in participating in the Project Gallery at the next TechNet Conference.

To do so, please complete the attached EOI template and return it to tc2017@technet-21.org before **Monday June 5th**. Be sure to include a brief summary of the project you wish to showcase at the Gallery, as well as an indication of how much space you will need and any other pertinent requirements you may have.

Once all responses have been received, the TechNet Conference Planning Committee will review the proposals and finalise the list of participating partners by **Friday June 23rd**. If your proposal is accepted, a formal Letter of Invitation to participate in the Project Gallery will be issued by **Monday July 10th**. Please note that, while the TechNet Conference will cover the cost of the space and setup for the Project Gallery, all other costs will be the responsibility of the participating partner.

For further information, visit the website at <http://www.technet-21.org/en/home/technet-conference/2017>

For any additional enquires relating to the Project Gallery or the TechNet Conference, please email tc2017@technet-21.org
