

FOURTH EYE STRATEGY ANNUAL PARTNERS' MEETING

VIRTUAL FORMAT

Hosted by the World Health Organization (WHO)

23-24 November 2020

AGENDA

Dear Partners and Colleagues,

Like the times we live in, this year's annual partners' meeting is unique. Our aim is to bring all partners together in a digital space, for a much shorter period of time, whilst retaining the energy and impact of meeting in person.

We endeavour to provide each region, partner and key stakeholder a platform during this year's event. In order to provide variety, and a space that encourages experience and knowledge sharing, as well as problem solving, we have adopted a new structure and agenda for this virtual format.

We have incorporated feedback from previous events, to maximise the engagement and participation for this year while highlighting regional and/or country representation and enabling plenty of audience participation. This means, for instance, that keynote addresses are integrated into each of the sessions.

We will also be encouraging continued interaction with speakers, and amongst participants, between the two days of the meeting and beyond.

This year, the annual partners' meeting will also provide opportunities for the EYE working group members to come together beforehand, in sessions designed to inform discussions in the broader annual forum.

For those of you that would like to share posters, summaries and other ancillary materials ahead of the event, we have created a dedicated [Dropbox folder](#) which will be accessible to all participants for all meeting documents.

To submit your documents to the Dropbox folder, please email them to: eye.strategy@who.int

Click here for the event [registration link](#). After registering, you will receive a confirmation email from zoom containing information about joining the webinar.

We thank you for your partnership and look forward to a fruitful and enjoyable meeting.

MEETING OBJECTIVES (MO)

1. Review retrospective EYE Strategy: achievements to date, including adaptations in the COVID-19 context
2. Discuss key lessons learned from recent yellow fever prevention and control experiences, which could inform EYE implementation
3. Prioritize next steps for EYE Strategy with strengthened partners' engagement, particularly country and cross-regional collaboration
4. Foster a healthy yellow fever vaccine supply situation cognizant of COVID-19 impacts

ADDRESSING STRATEGIC OBJECTIVES & COMPETENCIES IN THE MEETING

	Session
Strategic Objectives (SO):	
SO 1: Protect at-risk populations	Sessions 1, 2 & 4
SO 2: Prevent international spread	Sessions 3 & 4
SO 3: Contain outbreaks rapidly	Sessions 2, 3b & 5
Competencies for success:	
High-level governance and long-term partnerships	Session 1, 6 & 7
Synergies with others health programmes and sectors	Session 2, 5 & 7
Strong political commitment at global, regional, and country level	Session 2 & 7
Research and development for better tools and practices	Session 3 & 4
Affordable vaccines and sustained vaccine market	Session 6 & 7
