

## More resourceful than ever

The Temp°store is fully compatible with our solar energy solutions, empowering renewable energy use within remote locations. This enables self-sustaining operations over a period determined by local daylight hours and weather conditions.

The units are available with a fully integrated off-grid system, enabling multiple energy streams including grid, diesel, generator and solar. The off-grid's command centre allows for seamless control and energy access flow between all power sources, ensuring automatic power availability at all times.

The unit also comes with a fully integrated reporting structure, allowing for full temperature oversight through a portal accessible via web, phone or tablet.

## In a size range that suits all needs

**TEMP°STORE**  
THE AGILE SOLUTION

	
10m <sup>2</sup> floor coverage	26m <sup>2</sup> floor coverage
	
6 Euro pallets capacity	16 Euro pallets capacity
	
+2°C to +20°C	+2°C to +8°C
	
Ambient storage -2°C to +50°C	Ambient storage +2°C to +32°C
	
60 min assembly	4 hours assembly
