

Parsyl

Every Journey Matters

About Parsyl

Parsyl provides a quality assurance and risk management solution for vaccine supply chains

Parsyl Platform

Quality monitoring for sensitive health commodities in transit and storage

Modern sensing devices

Trek Pro

long lasting multi-sensor

Senses temperature, humidity, light and impact

Multiyear battery life

Records GPS location

 PQS Prequalified by WHO

Trek Tab

ultra thin & low cost

Senses and logs temperature data

Up to 100 days

Fast wireless offload

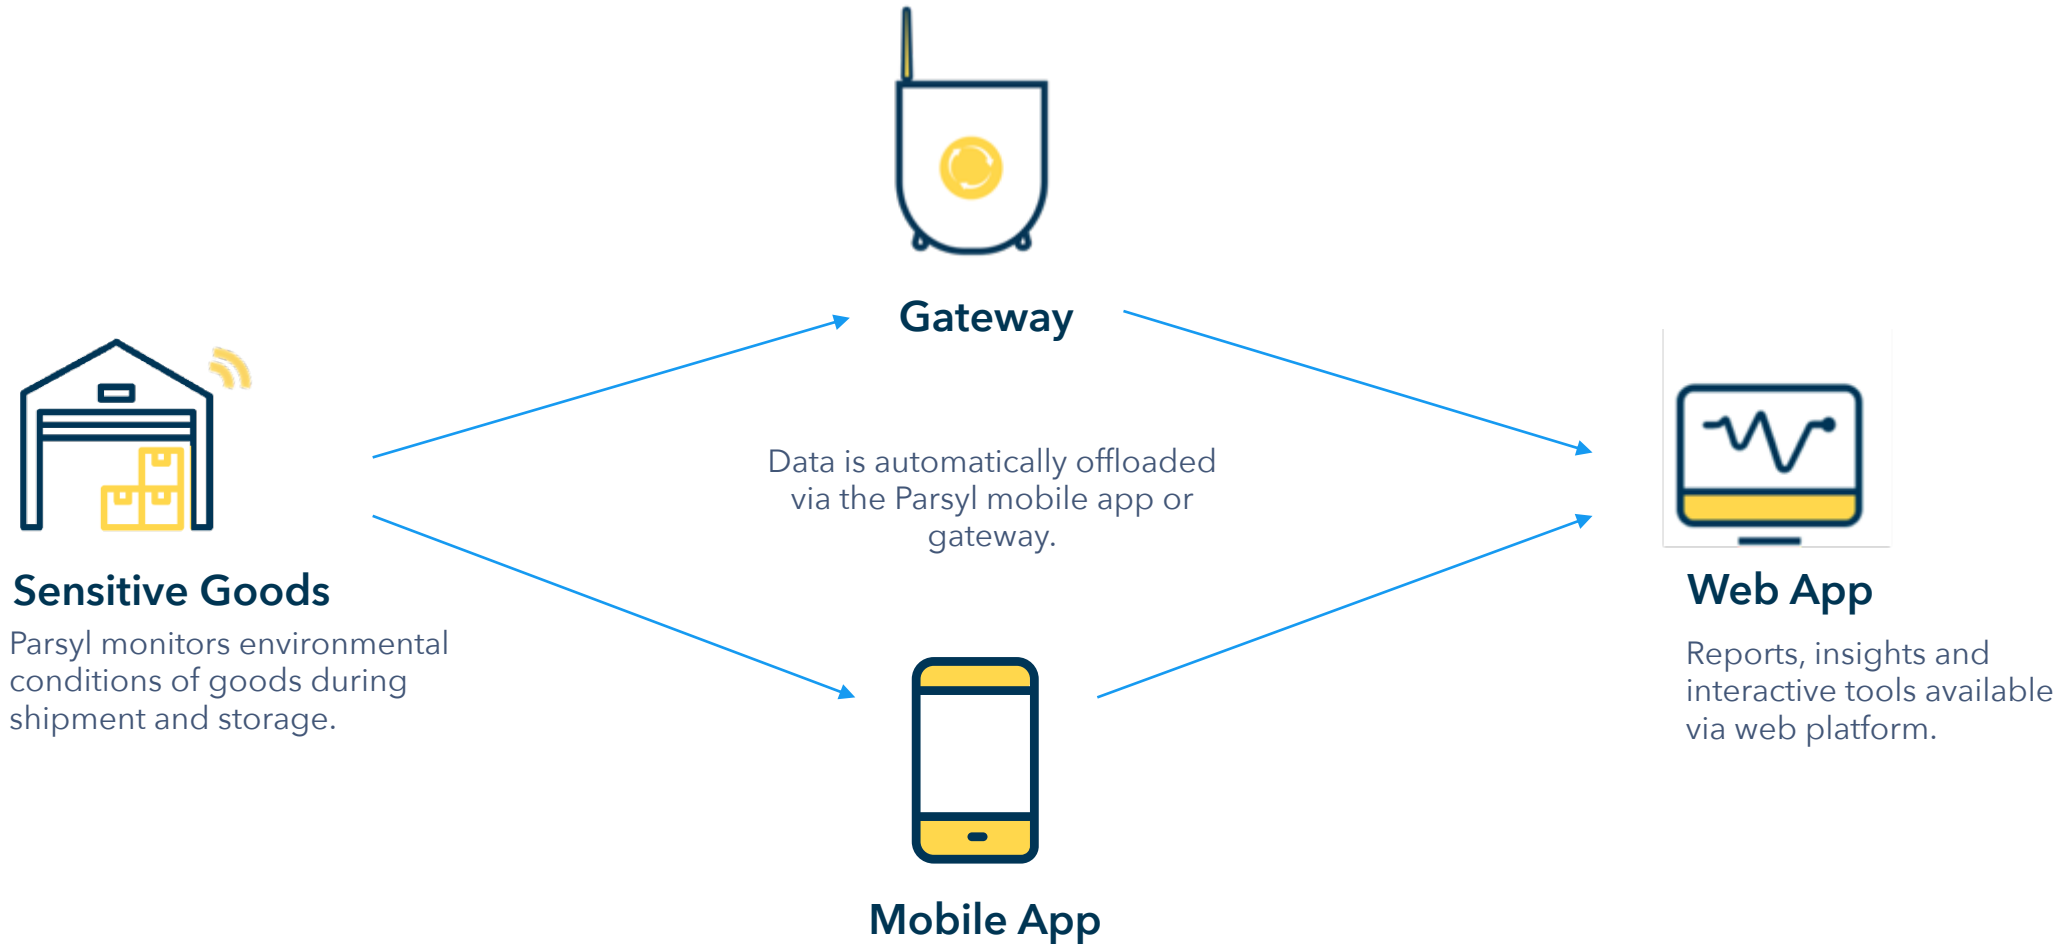

Configurable warnings and alarms

 PQS Prequalified by WHO

Easy to use Rugged, durable design Fast wireless offload Unmatched accuracy

Data offload is seamless and easy

Immediate insights in the palm of your hand

Easy to use

Create shipments and add information about the origin, destination, type of good and value.

Actionable insights

Receive summaries and critical alerts about the conditions of your goods.

Monitoring vaccines in storage

Monitoring vaccines in storage

Step 1

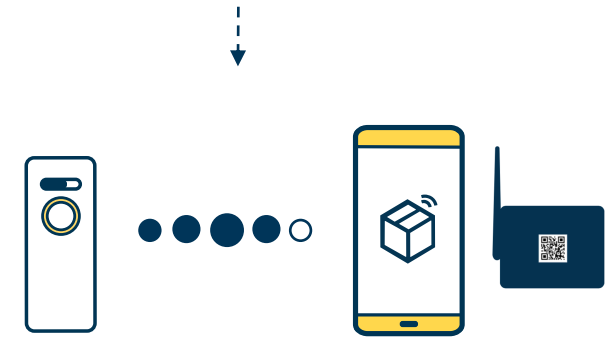

Slide switch to the right to start monitoring.

Step 2

Place Trek inside of the vaccine refrigerator/freezer (button facing up) and place QR code sticker on outside of refrigerator/freezer.

Step 3

Tap on asset in mobile app or scan Trek QR code sticker for easy data transfer.

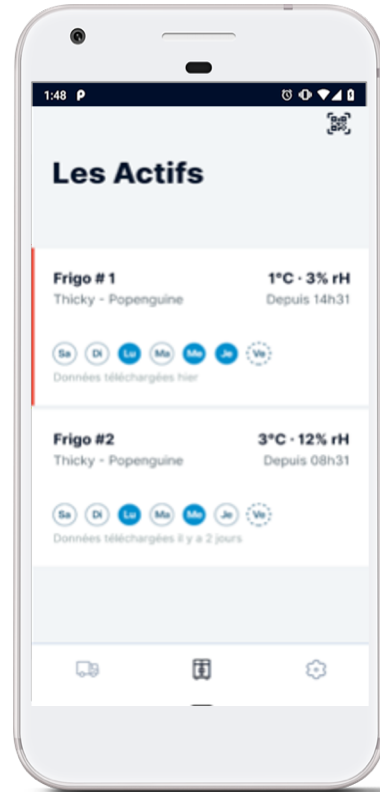

*Gateway will automatically transfer data from nearby Treks.

Checking the status of your vaccines in storage

Step 1

Log in to the Parsyl mobile app.

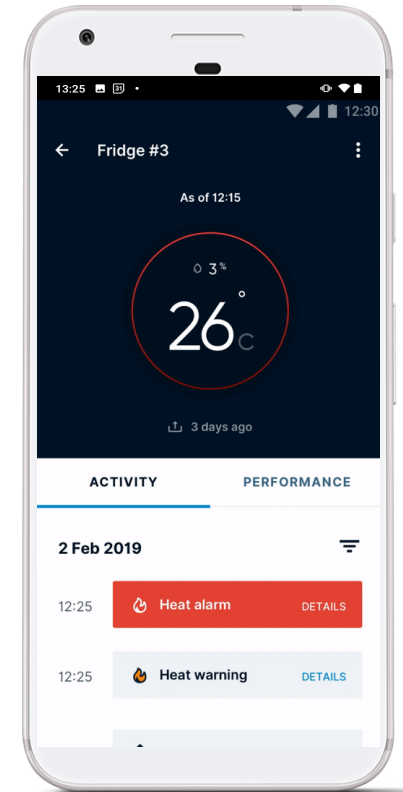

Step 2

Tap on asset to transfer data.

Step 3

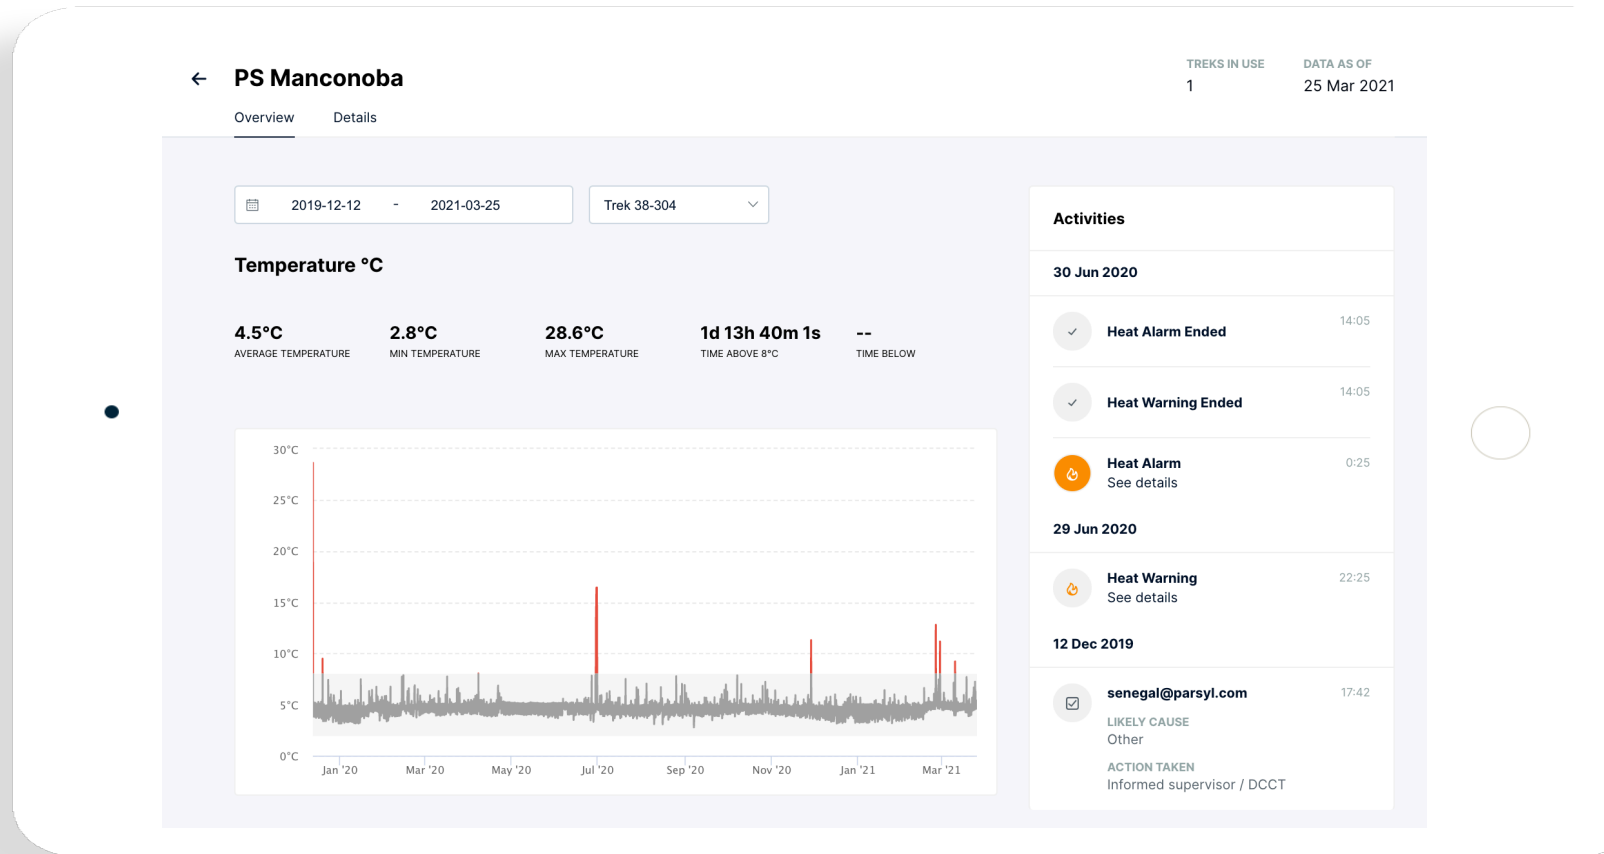

Analyze temperature and add comments or actions taken.

Step 4

Consult summaries and critical alerts about the conditions of your goods.

Uncover trends and patterns that will improve future performance

Receive SMS and/or email notifications about asset temperature excursions.

Monitoring vaccines in transit

Monitoring vaccines in transit

Step 1

Place Trek on top of vaccines in vaccine carrier.

Step 2

Send vaccine carriers out for vaccine administration.

Step 3

Scan Trek QR code or QR code sticker for easy data transfer.

Trek Tab

Powerful monitoring, smaller than a domino

Duplicate QR code label can be placed on outside of container or refrigerator for easy scanning via mobile phone.

Clear, actionable insights for Covid-19 vaccine monitoring

Just download the app and scan the QR code.
