# COVAX: Monitoring options offered by UNICEF

- As part of the Procurement Agent role, UNICEF COs will have the Dashboard available to be on top of the status of the transactions by COVAX

- As part of the Procurement Agent role, UNICEF SD will provide COs with a Provisional Plan after each round of allocation.

- VIVA will include COVAX vaccines and can support the planning process of COVAX

- An external dashboard is expected to be available displaying allocated vaccine quantities and status of the vaccine in the supply chain, i.e. procured, delivered

For COs: Supply Chain Dashboard in InSight

The UNICEF Supply Chain Dashboard is a tool for monitoring, information and analysis

- Has Supply and Logistics data sourced from UNICEF's ERP (VISION) system

- Provides high-level information, as well as order-specific features with an option to drill-down into detail

- Contains summary data to empower decision-making

- Contains a report to highlight exceptions

More views to be launched early 2021 to support detailed monitoring of the COVAX supply chain

Link: Supply Chain Dashboard

YOUR VIEW: Are you missing anything for you to monitor orders from your CO?

For COs to share with government partners: Provisional Plans

Provisional Plans will be shared after each allocation round to UNICEF COs. The plans will contain critical information for you to plan your own logistics:

- ✓ Allocated quantity

- ✓ Unit price

- ✓ Cold chain requirements

- ✓ Weight and Volume

- ✓ Supplier information

YOUR VIEW: Is there anything else that is critical for you do your planning internally within your countries?

For government partners: Visibility for Vaccines

What is ViVa?

ViVa is a free and easy-to-use online tool for country governments

An **early warning tool** for potential stock issues

An **advocacy tool** to enable funding decisions

A vaccine **pipeline visualization tool** showing stock levels and orders from UNICEF
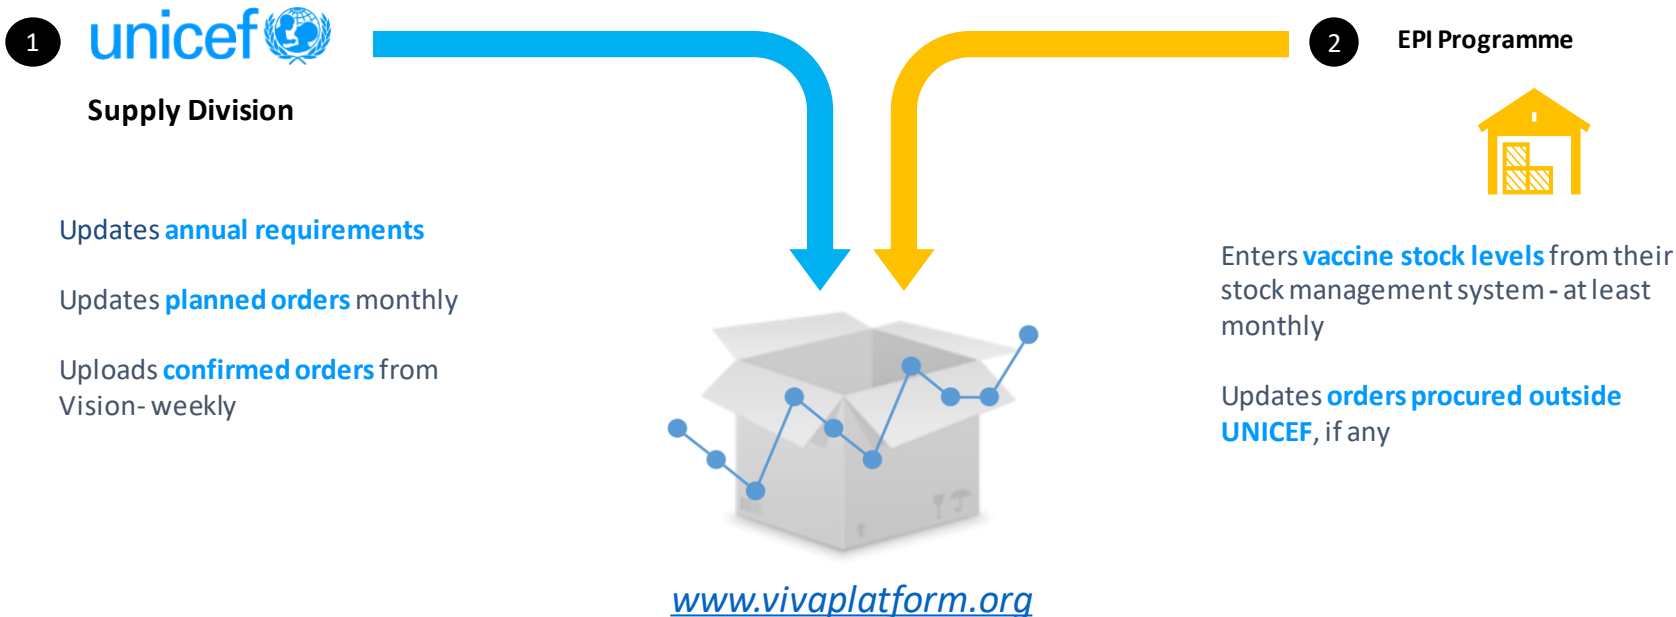

39 countries using ViVa

519 users

- 95% of users find ViVa very useful
- 72% reported that ViVa helped them address threats to stock-outs
- 63% used ViVa to address a threat of overstock

For government partners: Visibility for Vaccines

How does it work?

1 unicef

Supply Division

Updates **annual requirements**

Updates **planned orders** monthly

Uploads **confirmed orders** from Vision- weekly

2 **EPI Programme**

Enters **vaccine stock levels** from their stock management system - at least monthly

Updates **orders procured outside UNICEF**, if any

www.vivaplatform.org

# For government partners: Visibility for Vaccines

ViVa is NOT…

A Stock Management Tool

An Electronic Logistics Management Information System (eLMIS)

An interface to place orders to Supply Division

For government partners: Next Generation Stock Management Tool

Available Q3 2021

- Ensures vaccine stock managers and other EPI staff are supported to manage the vaccine program

- Builds off nearly 15 years of user experience and institutionalization (~ 40 countries)

- No or minimal implementation and support costs expected for countries

- Once developed, the new platform can be quickly available to countries

- **Will provide stock visibility up to the district level including for COVID-19 vaccines**

For all: Dashboards for external publication

Global view
- Includes all countries
- Key figures: PO, shipped

Country view
- Filter based, for all countries
- Key figures: allocation, PO, shipped

UNICEF country view

- Drill-down on key figures
- Detailed shipment status

Receiving Country map in 2020

COVAX: status of deliveries

	Allocated	On PO	Delivered
Congo, Rep. Dem	35.7%	36.5%	
Mexico	35.3%	39.8%	30.9%
Nigeria	26.8%	23.6%	30.0%
Pakistan	18.4%	24.0%	12.8%
France	16.6%	23.3%	9.9%
Morocco	11.4%	11.0%	11.8%
Indonesia	5.8%	6.2%	5.4%

200,000 doses
PO issued: 23 Mar

200,000 doses
Shipment: 3 April

Expected arrival: 13 April

For discussion

- Do you feel any **concerns** in UNICEF making the vaccine dose information public?

- what do you see as the **most important data and supply intelligence** that will help you in the management of the vaccines against COVID-19?

- what do you see as the **key challenges in terms of data** to manage the vaccines against COVID-19?
